ACKNOWLEDGMENT

The *Index of Dermatology* was compiled with the cooperation and assistance of the staff of the National Library of Medicine. The citations were processed by the Library's computer-based Medical Literature Analysis and Retrieval System (MEDLARS) and were printed from film composed by Graphic Arts Composing Equipment (GRACE), MEDLARS' high-speed photo-typesetter.

DHEW Publication No. (NIH) 76-304

PREFACE

In recent years there has been substantial activity within the field of dermatology. In 1968, a report, *National Program for Dermatology*, was published under the auspices of the American Academy of Dermatology, and was very favorably received resulting in the establishment of a Council for the National Program for Dermatology and numerous task forces for dermatology. One of these task forces, the Division of Education and Communication of the National Program, was instrumental in promoting dissemination of information pertaining to dermatology.

The *Index of Dermatology* was established and developed in cooperation with the National Library of Medicine (NLM) over a period of three years by Universities' Associated for Research and Education in Pathology (UAREP) under a grant from the National Library of Medicine (NLM). This grant expired in June, 1971, whereupon five dermatology societies jointly sponsored its publication until March, 1972.

The National Institute of Arthritis, Metabolism, and Digestive Diseases (NIAMDD) of the National Institutes of Health is responsible for support of research and training for research in the field of dermatology, predominantly through the use of grants for research and training, and the organization of conferences. To further the NIAMDD Dermatology Program as well as respond to the increased interest and activity in dermatology and cutaneous biology, the National Institute of Arthritis, Metabolism, and Digestive Diseases undertook the publishing of the *Index* in April, 1972.

LITERATURE COVERAGE

Citations for each month's *Index* are computer-selected from the current month's total input of NLM's computerized Medical Literature Analysis and Retrieval System (MEDLARS). The period covered by the issue of the bibliography corresponds to the same month of *Index Medicus*. All citations for the *Index of Dermatology* are retrieved solely on the basis of their relevance to dermatology. Each citation contains the full title of the article, first author, journal reference, and if the article is written in a foreign language, the language is indicated. Journal coverage is limited to journals included in *Index Medicus*.

FORMAT

Format and hierarchical organization of subject headings in the *Index* are similar to *Index Medicus*. Medical Subject Headings are usually in a direct, natural sequence (e.g. DERMOID CYST, ECTODERMAL DYSPLASIA), although inversion sometimes occurs (e.g. ECTODERMAL DEFECT, CONGENITAL). In order to group various terms sharing a basic concept, there is a sequential arrangement of the terms under the basic concept (i.e. CARCINOMA, BASAL CELL; CARCINOMA, BASOSQUAMOUS; CARCINOMA, EPIDERMOID). A citation may appear more than once under various Subject Headings if it deals with multiple topics. The user should bear in mind the fact that access to subject information in the MEDLARS computer is possible only by using the headings under which it is stored. This controlled vocabulary, revised annually by NLM, contains roughly 8,600 main headings. Alteration of the Medical Subject Heading (MeSH) system in order to adjust to changes in the current usage of a speciality is therefore complex. Understanding of this will help to explain occasional anachronisms. Where these occur, the editors have attempted to provide suitable cross-references. This is, of course a continuing process.

ORGANIZATION OF THE INDEX

The *Index of Dermatology* is arranged in five main sections.

I. Subject Headings Section contains all Subject Headings searched for this month, therefore, if a Subject Heading does not appear with citations listed under it, no citations were indexed with this Subject Heading for this month.

II. A Review Section, in which only review articles are cited. These citations contain the number of references and are selected in accordance with the definition of medical reviews employed by the NLM: "articles which are well documented surveys of the recent . . . literature."

III. A General Section in which citations on skin diseases, both general and specific, causative and therapeutic agents, and aspects such as immunology, mycology, virology, and oral disease are included.

IV. A Bio-Science Section, which is divided into two parts: Part I: Biology; and Part II: Cell Components.

V. An Author Section, in which author names are limited to three for any citation with the full citation appearing under the first author and cross references for the second and third authors.

LITERATURE ON VENEREAL DISEASE

No citations are given for "Venereal Disease" or for any of the specific diseases in that group. A detailed bibliography entitled "Abstracts of Current Literature on Venereal Disease," which includes references appearing in *Index Medicus*, is published four times yearly by the National Center for Disease Control. This publication may be obtained by writing to VD Branch, National Center for Disease Control, Atlanta, Georgia 30333.

OBTAINING REPRINTS

Reprints of articles cited should be acquired directly from the authors of the articles. Further assistance, should it be needed, is usually available from local medical or hospital libraries and Regional Medical Libraries.

OBTAINING TRANSLATIONS

Guidance in obtaining translations of articles in foreign languages may be supplied by the National Translation Center, John Crerar Library, 35 West 33rd Street, Chicago, Illinois 60616, which is a national depository library for translations.

DISTRIBUTION

A limited number of free copies of *Index of Dermatology* is available to National Institutes of Health grantees or contractors and to medical libraries. To receive free copies of this publication requestors must include their grant or contract number and the title of their project. Medical libraries should indicate the interest of their users in the field of dermatology. These requests as well as address changes and other communications pertaining to *free* copies should be addressed to:

Scientific Communications Office
Index of Dermatology
National Institute of Arthritis,
Metabolism, and Digestive Diseases
National Institutes of Health
Building 31, Room 9A29
Bethesda, Maryland 20014

Individuals and organizations *not qualifying for free copies* may receive this publication by subscribing directly to:

Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

payable in advance at the following prices:

$21.50 a year, United States, Canada, and Mexico
5.40 additional for foreign subscriptions
1.80 single copy

The Secretary of the Department of Health, Education, and Welfare has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department. Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through April 30, 1978.

I. SUBJECT HEADINGS SECTION

All main subject headings employed for the Index of Dermatology are listed alphabetically in the following pages in large CAPITAL LETTERS. Terms which will not appear as headings are cross-referenced to main headings. These also appear in alphabetical order, but in small letters.

The section or sections of the Index in which each main heading will appear when there is a relevant citation is indicated by a letter following the heading in parentheses, as follows:

(R) Review Section

(G) General (Clinical) Section

(B) Bio-Science Section, Part I (Biology)

(C) Bio-Science Section, Part II (Cell Components)

The selection of main headings listed below results from continuing refinement of a thesaurus developed by an Advisory Committee, professional consultants and the staff of the National Library of Medicine.

Mercury residues in the common pigeon (Columba livia) from the Jackson, Mississippi, area--1972. Knight LA Jr, et al. Pestic Monit J 8(2):102-4, Sep 74

GROWTH & DEVELOPMENT

[Relative lengths of juvenile primaries in European and Indo-Malaysian woodpeckers (Picidae)] Sutter E. Rev Suisse Zool 81(3):684-9, Oct 74 (Eng. Abstr.) (Ger)

FIBROBLASTS

The pathogenesis of bleomycin-induced pulmonary fibrosis in mice. Adamson IY, et al. Am J Pathol 77(2):185-97, Nov 74

Cell cycles in human diploid and aneuploid strains. Kukharenko VI, et al. Humangenetik 24(4):285-96, 1974

DRUG EFFECTS

In vitro-effects of vitamin A acid on cultured fibroblasts, lymphocytes and epidermal cells: a comparative study. Christophers E, et al. Arch Dermatol Forsch 251(2):147-53, 1974

Solubility of collagen from normal and scleroderma fibroblasts in culture. Bashey RI, et al. Biochem Biophys Res Commun 62(2):303-7, 20 Jan 75

ENZYMOLOGY

Reduced arylsulfatase B activity of the mutant enzyme protein in Maroteaux-Lamy syndrome. Shapira E, et al. Biochem Biophys Res Commun 62(2):448-55, 20 Jan 75

3-hydroxy-3-methylglutaryl coenzyme A reductase activity in human hair roots. Brannan PG, et al. J Lipid Res 16(1):7-11, Jan 75

GROWTH & DEVELOPMENT

Cyclic AMP-elevating agents inhibit proliferation of keratinizing guinea pig epidermal cells. Delescluse C, et al. Differentiation 2(6):343-50, Dec 74

Plasma membrane components of skin fibroblasts from normal individuals and patients with cystic fibrosis. Baig MM, et al. J Pediatr 86(1):72-6, Jan 75

METABOLISM

Solubility of collagen from normal and scleroderma fibroblasts in culture. Bashey RI, et al. Biochem Biophys Res Commun 62(2):303-7, 20 Jan 75

PHYSIOLOGY

Autoradiographic investigation of DNA synthesis in skin surrounding a wound in mice. Kraznikova NA. Bull Exp Biol Med 77(5):557-60, Nov 74

ULTRASTRUCTURE

In-vitro culture of Kaposi's disease cells. Ottolenghi F, et al. Arch Dermatol Forsch 250(4):389-93, 1974

Recurrent granular corneal dystrophy. Stuart JC, et al. J Am Vet Med Assoc 166(1):18-24, 1 Jan 75

The pathogenesis and structure of paraquat-induced pulmonary fibrosis in rats. Smith P, et al. J Pathol 114(2):57-67, Oct 74

Plasma membrane components of skin fibroblasts from normal individuals and patients with cystic fibrosis. Baig MM, et al. J Pediatr 86(1):72-6, Jan 75

FOOT DERMATOSES

OCCURRENCE

Physical work load on and dermatoses of feet of dam workers standing on an inclined plane. Horino S, et al. J Hum Ergol (Tokyo) 2(2):185-200, Dec 73

GRANULATION TISSUE

An investigation into the mechanism of placental damage in rats inoculated with Salmonella dublin. Hall GA. Am J Pathol 77(2):299-312, Nov 74

Cyanoacrylate and oral wound healing in hamsters. Giunta JL, et al. Arch Oral Biol 19(10):845-9, Oct 74

Biologic effects of root canal filling materials. The effect on bone tissue of two formaldehyde-containing root canal filling pastes: N2 and Riebler's paste. Spångberg L. Oral Surg 38(6):934-44, Dec 74

[Effect of rays of a powerful pulse laser on the kidney in experiments] Troitskiĭ RA, et al. Urol Nefrol (Mosk) (3):24-5, May-Jun 74 (Eng. Abstr.) (Rus)

ANALYSIS

haemodiserin iron in synovial tissue in rheumatoid and tubercular arthritis-a re-assessment of the mechanism of deposition. Kumar R, et al. Indian J Med Res 62(8):1146-51, Aug 74

DRUG EFFECTS

[Pharmacological study of ketoprofen (19583RP). Report No. 1. Anti-inflammatory, analgesic and antipyretic activities in oral administration] Fujimura H, et al. Folia Pharmacol Jpn 70(4):543-68, Jul 74 (Eng. Abstr.) (Jpn)

ENZYMOLOGY

The effect of azetidine-2-carboxylic acid on the biosynthesis of collagen in rat granuloma. Dancewicz AM, et al. Acta Biochim Pol 21(4):429-36, 1974

METABOLISM

Inhibition of protein synthesis in tendon cells by extracts from experimental granulation tissue. Aalto M, et al. FEBS Lett 49(1):70-2, 1 Dec 74

[Experimental animal studies on the anti-inflammatory effect of pyridinolcarbamate] Rave O, et al. Arzneim Forsch 24(11):1779-85, Nov 74 (Eng. Abstr.) (Ger)

PATHOLOGY

[Etiopathogenic aspects of granulomatous inflammation of the genital tract in males] Banchieri FR, et al. J Urol Nephrol (Paris) 79(10-11):938-42, Oct-Nov 73 (Fre)

[Treatment of therapy-resistant leg ulcer using repeated applications of foreign skin (homologous transplants)] Krupp S, et al. Schweiz Med Wochenschr 104(33):1148-53, 17 Aug 74 (Eng. Abstr.) (Ger)

HAIR

Menkes' disease--a hypothesis with recommendations for future investigations. Reske-Nielsen E, et al. Acta Neuropathol (Berl) 28(4):361-3, 1974

Trichobezoar in Meckel's diverticulum. Lodewijks HB. Arch Chir Neerl 25(2):173-7, 1973
